

SWE-bench Multimodal evaluation status

Per-prediction results for both with_image and without_image. The patch column records whether the model diff applied. The reason column separates harness completion, model-test failures, runner failures, and missing reference baselines.

Prediction rows	Unique instances	Complete pairs	Harness completed	Resolve scored	Resolved yes
314	157	157	307	303	77

Image-impact feedback

With-image and without-image are separate predictions. In the verified pairs below, an image can help, hurt, or make no difference. The four explicit image-hurt cases are listed so they can be audited directly.

Pair outcome	Pairs	Examples / interpretation
Image helped (no -> yes)	17	bpmn-io__bpmn-js-1168, bpmn-io__bpmn-js-1221, carbon-design-system__carbon-4167, carbon-design-system__carbon-6691
Image hurt (yes -> no)	4	alibaba-fusion__next-3454, openlayers__openlayers-13669, openlayers__openlayers-15234, openlayers__openlayers-15365
Both resolved yes	28	GoogleChrome__lighthouse-2016, GoogleChrome__lighthouse-5688, PrismJS__prism-2703, PrismJS__prism-3174
Both resolved no	82	GoogleChrome__lighthouse-14800, GoogleChrome__lighthouse-5011, PrismJS__prism-1853, PrismJS__prism-3442
Both unscored/undefined	26	GoogleChrome__lighthouse-12067, GoogleChrome__lighthouse-2610, PrismJS__prism-1602, PrismJS__prism-1895

Verified image-hurt cases: alibaba-fusion__next-3454: with_image = no, without_image = yes; openlayers__openlayers-13669: with_image = no, without_image = yes; openlayers__openlayers-15234: with_image = no, without_image = yes; openlayers__openlayers-15365: with_image = no, without_image = yes.

Across 157 complete pairs, 110 scored pairs had the same yes/no outcome with and without the image. This is an outcome comparison only; it does not imply the image caused the result.

The supplied feedback counted 17 helped, 4 hurt, 27 both yes, 76 both no, 32 both unscored/undefined, 1 mixed. This PDF recomputes the categories from the current raw results as 17 helped, 4 hurt, 28 both yes, 82 both no, 26 both unscored/undefined, 0 mixed; the difference reflects the latest available runs and is intentionally not hidden.

How to read the table

with_image and **without_image** are two independent model patches for the same instance. They are not a pass/fail comparison by themselves. **Tests / raw pass / raw fail** describe the whole test suite under that one model patch. **Patch** reports real git-apply status in the checked-out repository; “not checked” means execution stopped before that stage.

Scoring group	Before reference	Gold reference	Model result counted as success
F2P - bug-fix tests	Fail	Pass	Pass
P2P - regression tests	Pass	Pass	Pass

F2P total is the number of tests that failed before the gold fix and passed after it. **F2P passed** is how many of those bug-fix tests the model patch passes; **F2P missing** is how many were not observed. **P2P total** is the number of tests that passed both reference runs. **P2P kept passing** is how many remained passing with the model patch; **P2P regressed** is how many started failing; **P2P missing** is the remainder not observed. **Resolved = yes** requires every F2P test and every P2P test to pass. **Resolved = no** means a required test failed or was missing. **Resolved = undefined** means F2P total is zero. A dash means scoring is not available; use Scoring status to distinguish not scored from a resolution result.

Whiteboard reference: paired with-image / without-image test outcomes

	Test 1	Test 2	...	Test n.
With image	✓	✓		
Without image	✓	X		

7 patch did not compile at all.

Passing without the patch
Failing with patch ← $P2 \neq ?$ Pass when K Fail when?

Failing without a patch
Passing with patch ← $F2 \neq ?$

↓
Why not Ques? :)

What's $P2P$ pass? what is this is being + or
" " $P2P$ Fail?
" " $F2P$ pass?

Refer to
Test passing
or failing before/after patch

With-image / without-image pair audit

The selected folder contains 314 prediction rows for 157 unique instances: 157 instances have both variants and 0 have only one selected variant. Missing means no counterpart prediction row exists in this paired selection; it is not a test failure. Four unmatched source files were excluded: PrismJS__prism-1585, carbon-design-system__carbon-12410, eslint__eslint-14242, prettier__prettier-8536.
